Re-configuring Eudora for Windows - POP

1. Start Eudora
2. From the Tools Menu select Options
3. Click on the Getting Started Icon and update the Mail Server and SMTP Server information – be sure your email address has @iwu.edu
4. Click on the Checking Mail Icon and adjust the Mail Server to pop.gmail.com, and Secure Sockets setting to Required, Alternate Port
5. Click on the Incoming Icon and verify POP is selected

6. Click on the Sending Mail icon and be sure all the check boxes are selected and Required, Alternate Port is selected

7. Click OK - You are all done! Quit Eudora, then restart Eudora and check your email!
