Thunderbird for Mac – IWU Email Reconfigurations

1. Go to the Tools menu, Choose Account Settings
2. Click on Server Settings (left hand side)
3. Look at the Server Type – Is it POP or IMAP?
4. Follow the correct instructions below.

**POP**
Adjust the Server Name, Port number, User Name and Security Settings as shown below, (however, titan@iwu.edu is reserved for Timmy Titan, so you'll need to use your own username) - remember the @iwu.edu for this step!

<table>
<thead>
<tr>
<th>Server Type: POP Mail Server</th>
<th>IMAP Mail Server</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Server Name:</strong></td>
<td>pop.gmail.com</td>
</tr>
<tr>
<td><strong>User Name:</strong></td>
<td><a href="mailto:titan@iwu.edu">titan@iwu.edu</a></td>
</tr>
</tbody>
</table>

**Security Settings**
- Connection security: SSL/TLS
- Authentication method: Normal password

(For IMAP & POP)

Next, on the left hand column, click on the Outgoing Server (SMTP) link.
Click the Outgoing Server line to highlight it, then click “Edit”

When the Settings window opens, you can see the changes that Tommy Titan made to get his mail
Make your changes and click OK!

Click OK!
