June 2017

How are artists' books different from others? Images, objects and/or words may be used in conveying the message in artists' books. These artists pay particular attention to the medium chosen to support their message and/or communicate a message by creating meaning in combination with other elements of the book. Readers may experience the message in a linear, predetermined path in a two-dimensional structure, or they may be offered options for exerting control of the message with interactive elements such as the ability to change the order of the elements or to read/view parts in multiple dimensions.
