

May Term Travel to England, Scotland, and Wales

Environmental Studies 270

The Greening of Great Britain: Environmental Sustainability Past, Present and Future

Hampton Court Palace

Center for Alternative Technology, Wales

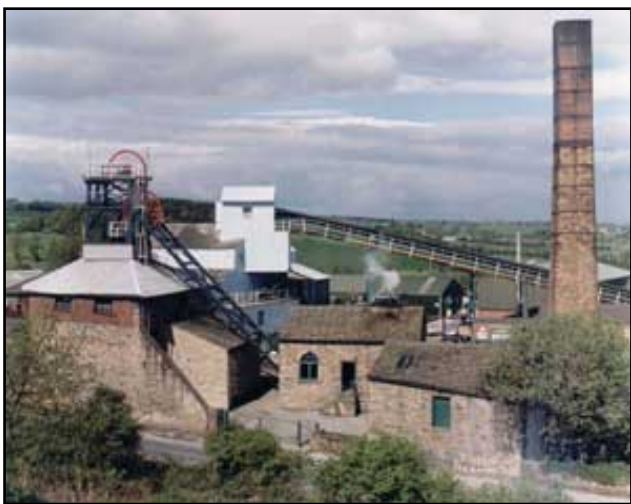

22 days in the UK!

Course Fee: \$5,465 (All meals included)

AV, ES major/minor elective

This May Term travel course to England, Scotland, and Wales, provides a transatlantic perspective on environmental sustainability. In it, we explore our attitudes and impacts on the environment, where they come from, and what to do to live sustainably.

- We begin in **London**, visiting the gardens and palaces of the British monarchy;
- Head north to the **Yorkshire Coal Mine Museum**;
- Spend a week in the **Scottish Highlands** at **Aigas Field Study Centre**, exploring contemporary environmental policy and restoration work through field study;
- Travel to the **Centre for Alternative Technology (CAT) in Wales**, where we measure our ecological footprint and learn about sustainable technologies;
- **Wrap-up in London**, exploring the city's **environmental policies, green architecture, and NGO activism**, and considering what effects Britain's exit from the EU may have on sustainability.
