CC Motion 1 (Minor in Risk Management)**

Motion 1: Delete the Minor in Risk Management

Rationale

(From Jaime Peters, Accounting and Finance)

Why are you making this deletion?

The Risk Management Minor is an undersubscribed program without the resources to properly offer the curriculum. The capstone course has not been offered in at least five years. The program has served 0-2 math majors every year for the past five years. Each of those students were actually interested in the risk management minor to help with taking the actuarial exams. Our new actuarial concentration in math is a better fit for that purpose. Due to double counting issues, no finance, business or accounting major is eligible to take get a risk management minor- although the courses often count as an elective in the business and finance major/minors. We intend to continue to offer every course in this sequence, with the exception of the capstone, as a part of the finance/business curriculum.

If the proposed deletion is cross-listed or contributes to other programs, has the other department been consulted and do these colleagues agree?

While all of the classes used in this minor are cross-listed, the deletion of the minor would not truly affect other departments, as we will only be proposing to drop the capstone class from the catalog.
