

## Jarret's Bio:

Hey! My name is Jarret Easterday (he/him) and I am currently a junior biology major here at Illinois Wesleyan. I love working with anything related to biology, chemistry, or science oriented. I am always looking forward to working with new students! A typical session with me will look something like this:

- We will work together on any questions or concerns you have regarding homework, quizzes, or exams
- When working through problems, I have found it to be very helpful when the student writes their work down and explains their thought process while writing. I will be following along and will help guide you to your own conclusions
- Regardless, if you have only one question or many, I am more than happy to help you understand the material

I personally believe that tutoring is an outstanding resource for all students. It provides a learning environment that is more relaxed than a typical classroom. As a tutor, I strive to implement an atmosphere of mutual respect as well as a comfortable space for students to ask any question they may have in regard to academics.

I thoroughly enjoy chemistry, especially organic and biochemistry. As a tutor, I hope to strengthen your skills in the field of science. I may not have an answer to all of your questions, but if there is something that I do not know, we will work together to help gain an understanding.

My main goal as a tutor is to help you in any way that I can. I am very flexible with different learning styles and will adjust accordingly to whatever makes you most comfortable. This is my second semester as a tutor. I am the CET for Dr. Mohan's organic chemistry class (CHEM 312). I am looking forward to working with you! My office hours are on Tuesdays and Thursdays from 7 to 8 p.m. in CNS C101.
